

# 5 Roll Out Shelf Options

(for your home & cabinets)

Have you ever felt defeated while trying to access the items stored in the back of your kitchen cabinets? Is kneeling or squatting difficult for you?

Fortunately you can outsmart the things that have been frustrating you.

At All Organized we've helped thousands of people love their kitchen again. Say goodbye to barely accessible corners and sore knees.

All you have to do is:

**1. Show us your worst cupboards.**

**2. Let us sweat the design challenges.**

**3. Look like a genius.**

Here are **5 types of roll out shelf options** that are bound to revolutionize your kitchen organization!

# 1

# Standard Roll Out Shelves

Replace the shelves in your cabinets with specially designed drawers that pull all the way out and allow you access to everything on them. Why reach back into your cabinets when you could access everything in your lower cupboards without breaking a sweat? With the standard roll out shelves you can:

Convert the false front under your cooktop into usable storage space for spices or utensils.

Organize your large platters, trays, and cookie sheets.

Organize your storage containers and lids in our divided double deep drawers.

Add two tier roll outs for spices or dishes.

Add roll outs to your extra wide cupboards. Unfortunately we can not guarantee shelves wider than 36".

Our standard roll outs are 3 inches high or can convert to 6 inches high. We craft them to fit your openings. They hold up to 100 lbs and are ideal for your kitchen, bathroom, linen closets, under sinks, and pantries.

## Corner Solutions

How long do your arms need to be to reach the back of your corner cupboard? You could make arm extensions or you could try one of the following corner solutions. (Pro tip: corner solutions are more reliable than arm extensions.) Accessing the back of your cupboard should be stress free. Maximize the space in your corner cupboards and look like a genius.

- Lazy Susan comes in three different options: pie, kidney, or standard lazy susan.

- Twisty Susan requires an 18" opening to your blind corner cupboard. It glides in and out of your corner cupboard and can hold up to 65 pounds.

- Sassy Susan not only can you pull the drawers out but you can also spin them around for maximum access.

Make your corner cupboards work for you. Give yourself the upgrade you've always wished for!

# 3 Roll Out Caddy

The space under your sink holds a fraction of what it could hold. The plumbing prevents you from using much of the space for actual storage. With our perfectly designed and fully customized options you can reclaim this part of your kitchen.

**The Lift Out Caddy attaches to a standard roll out under the sink to fully maximize your existing space. At 8" wide, it can fit beside your plumbing.**

**The Sliding Caddy is also 8" wide and fits beside your plumbing. It attaches to the side of your cabinet and has fully extendable drawer glides.**

**The Short Roll Out looks exactly as it sounds. It fits in front of your plumbing and allows for easy access to that space.**

All of these options can be combined in a way that will fully maximize the space under your sink.

## Trash/Recycle Center

Your trash and recycle bins should be easily accessible. Tuck them away inside of a cupboard and easily roll them in and out as you need them. Like all of our other solutions, the trash and recycle center dimensions can be customized to fit your needs.

Do you wish you could replace your old trash compactor? Our trash and recycle center is a great replacement option. Our trash and recycle hardware can fit on your old trash compactor's face saving time and money.

# 5

## Pantry Roll Outs

Do you wish you could access the back of your pantry as easily as the front? The pantry roll outs are fully extendable and allow for full access. We custom make your pantry roll out shelves to fit your cabinets. Like our other roll out options, the pantry roll out shelves are handcrafted with only the best materials and have a lifetime warranty.

## Conclusion

Roll out shelves will transform your kitchen's storage capacity and efficiency. Why put up with barely accessible corners and sore knees? Revolutionize your kitchen. They won't wash your dishes or mop the floor, but roll out shelves will help you love your kitchen again.
